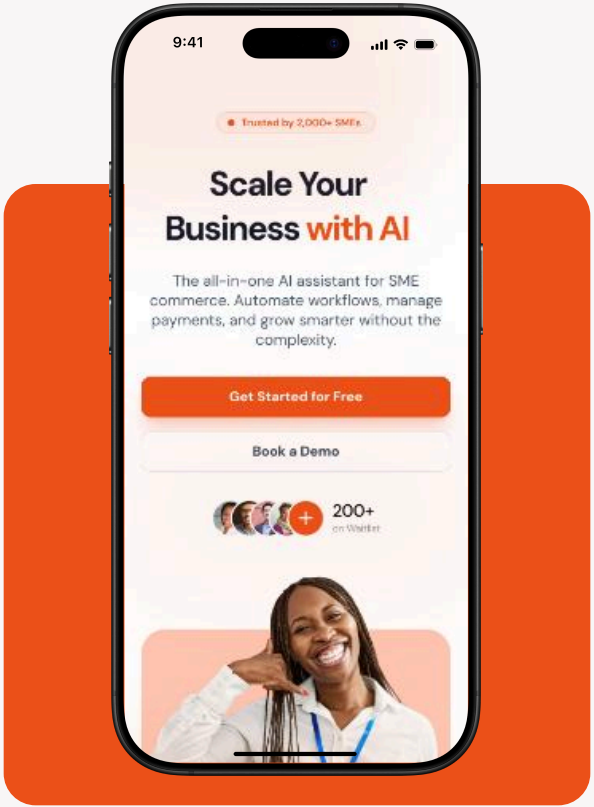
The Problem?

Why Nigerian SME's Are Losing Sales

- Manual delayed replies
- Fragmented Checkout
- Hand-written receipts
- Lost leads
- Traditional e-commerce is expensive

78%

of customers buy from the first business that responds to their query



Solution

SmartBiz AI is a customisable, AI-powered commerce assistant that any Small and Medium Enterprise (SME) can deploy for their customers. Unlike general-purpose chatbots, SmartBiz AI is trained on each business's catalog, pricing, and policies, enabling customers to browse products, ask questions, and complete a purchase entirely within a single conversation.

The platform is built for the Nigerian SME market, integrates directly with Interswitch for payments, and delivers automated invoicing to both the customer and the business owner via WhatsApp and Email

How It Works

01

Customer Interaction

Ask & Discover – Customer opens SmartBiz AI and asks questions.

02

AI Assistance & Purchase

Instant Guidance – AI answers, recommends products, and completes the sale.

03

Payment & Follow-Up

Seamless Checkout – Customer pays via chat; invoice sent and AI handles post-sale updates.

Features

01

AI Chat

Trained on SME's catalog, brand voice and pricing

02

Instant Payment

Interswitch Integration, in-chat payment

03

Auto Invoicing

Instant invoice PDF delivery via WhatsApp, Telegram, and email.

04

Dashboard

Real time transactions, analytics, revenue tracking

05

Whatsapp/Telegram Native

SmartBiz AI assistant responds to customers enquiry 24/7

06

Easy Setup

5 minute onboarding. No coding required
